

## Woody Woodpecker's KidZone®

Woody Woodpecker's KidZone is home to some of the most popular stars in children's entertainment, along with a variety of rides, shows and attractions that appeal to all ages.

### E.T. Adventure™

Minimum Height 34" (86.4 cm) Under 48" (121.9cm) Supervising Companion Required

E.T. needs your help. His home planet is dying and only you can help him save it. Board your flying bike with E.T. in the front basket and take off on a thrilling (but gentle) ride through the sky. You'll have to dodge bad guys trying to track him down. If you do, you'll soar above the city and into the stars where his magical home awaits, filled with wondrous otherworldly creatures.

### Animal Actors On Location!™

Hollywood's favorite feature creatures are ready for their close-ups in a show that's paws-itively wild. Here's your chance to see some of the most talented animal actors perform in a hilarious mix of video segments, live skits and audience interactions.

### Woody Woodpecker's Nuthouse Coaster™

Minimum Height 36" (92 cm) Under 48" (121.9cm) Supervising Companion Required

Who better to ease first-timers onto the track than that wacky woodpecker, Woody? This thrilling kid-friendly coaster gently swoops and turns through Woody's very own nut factory, filled with silly puns and corny jokes. It's all the fun of a classic coaster without any daredevil drops. The ups and downs may be small, but the smiles are huge for both kids and parents alike.

### A Day in the Park with Barney™

It's the only place on Earth where kids can meet Barney and his friends Baby Bop and BJ in a sing-along, clap-along musical show 365 days a year. While they perform familiar favorites, leaves fall from the sky, snowflakes flutter down and the stars come out along with a few more magical surprises.

### Fievel's Playland™

Inspired by Executive Producer Steven Spielberg's lovable animated character Fievel Mousekewitz, kids can run, jump, climb and bounce through this whimsical playground filled with oversized props from the films *An American Tail* and *Fievel Goes West*. They'll see the world through Fievel's eyes as they climb a 30-foot spider web, crawl through giant tin cans, cross swaying rope bridges, explore an enormous cowboy boot, splash in a 1,000-gallon cowboy hat and take on a twisting 200-foot water slide.
